

RP160

Term Tech Two Part Polyurethane Resin Pack 210ml/310g

The Termination Technology range of polyurethane resin is perfect for cable jointing, electronic encapsulation and PCB encapsulation. Utilised in our resin joint kits, these packs can be purchased additionally for other uses. Two part resin which reacts once mixed, allowing time to pour into the required container to harden. Full hardening takes 24 hours although it can be energised after an hour.

Technical Data

Colour and Material

Material Polyurethane (PU238) resin

Durability

Chemical Resistance Impervious to most everyday chemicals including hydrocarbons

Physical Attributes

Style Two component, resin and hardener

Perishability Expiry date stated on packaging

Re-enterable No

Product Specification

Specific Approvals ROHS Compliant 2002/95/EC

Quantities and Packaging

Packaging Heavy duty pouch with a divider separating the components

Quantity (ml) 210
