

SPA range

Standard panel aluminium from **bell**system

The SPA panels are supplied in the model 900 series door entry systems and are a popular choice due to their high durability, resistance to corrosion and low cost.

These panels offer a contemporary and attractive style. The panels up to 10 buttons are manufactured from 3mm brushed anodised aluminium with an integral grill that protects the speech unit and complements the surface back box. The grill has fixings on the rear to firmly secure the speech unit. As standard, the panels are supplied with a low-profile surface mounting box moulded in black to complement the push-buttons. Alternatively, the panels can be supplied with a flush fitting zintec back box and vandal resistant bolts. A single push-button with integral nameplate is provided for each station including an optional Tradesman's button. Optional backlighting can be achieved by fitting a model SPA-LAMP lamp unit to each push-button.

Model SPA1

Model SPA4

Model SPA6

Model SPA12

Panel sizes above 10 buttons have a different style and are flush fitting only. Sizes on application. Panel dimensions are approximate and may change without notice.

SPA Door Entry Panel Dimensions SPA1 to SPA10 and SPA1F to SPA10F
