

801

Door entry telephone from **bell**system

The model 801 is Bell Systems' original door entry telephone. It has been re-styled a number of times over the years and still maintains its classic design.

The 801 telephone continues to be the most popular in the UK market owing to its exceptional reliability and economical price.

The model 801 telephone operates from both 12V AC or 12V DC and is included in the standard model 900 and VRK audio door entry systems as well as the CS and Bellprox series of combined keypad and proximity door entry systems.

The telephone is manufactured in white high-impact ABS plastic for high durability and complements most wall furnishings. It incorporates a 'lock release' push-button discreetly positioned on the base and under the handset to prevent inadvertent use. With its wide handset the model 801 is especially recommended for the elderly.

The Electronic Ringing Tone has a useful safety feature whereby the tone is reduced when the handset is 'off the hook'. The telephone has two levels for the ringing tone. A HI or LO position can be set within the telephone on installation or at future date.

Models available

- Model 801 (standard)
- Model 801 - DESK (desk mount)

Dimensions (mm) H212 x W85 x D55
